EDUCATION

Bachelor of Information Technology | University of Technology Sydney Aug 2023 – Expected Nov 2028
Major: Data Analytics · Sub-major: Enterprise Software Development · GPA 5.50 / 7.00 (WAM 73.1) · On leave for military service

International Baccalaureate Diploma | International School Brunei Jul 2021 – Jul 2023

PROFESSIONAL EXPERIENCE

Marketing Intern (Data & Automation) | Dr.Reju-All, Global Marketing Seoul, South Korea · Jan 2026 – May 2026

- **Achieved 150% of KPI targets** and contributed to USD 300K+ in profit by automating manual marketing work with AI-assisted data workflows; received the Best Intern Award.
- **Automated influencer scouting** by collecting profile and engagement data worldwide and ranking creators with a rule-based score built on past campaign results and brand fit.
- **Became Project Owner for Singapore and Malaysia** within two months, alongside the US market, working directly with the B2B and SCM teams.

Data Analytics Intern | Graduated.io (early-career platform) Sydney, Australia · Mar 2025 – Nov 2025

- **Presented a market analysis and growth strategy to Australian bank representatives** in the company's investment pitch.
- **Analysed the Australian graduate job market** by industry to size demand and identify revenue opportunities in the student audience.
- **Led a 6-person marketing project team,** using A/B tests, trend analysis and user-behaviour data to shape LinkedIn content, including interviews with PwC executives and startup founders.

Data Science Intern | Sports2i (sports data & statistics company) Seoul, South Korea · Jul 2025

- **Built a data-cleaning and feature pipeline** on company-provided 2024–25 KBO data, including rolling performance metrics masked for variable group sizes.
- **Tested 5 model families,** from linear regression to XGBoost, LSTM and a PyTorch Transformer, evaluated with MSE, MAE and R^2 and refined weekly on supervisor feedback.
- **Showed that the available features had almost no predictive value** ($|r| \leq 0.02$) and that complex sequence models did not beat a simple baseline, redirecting the project toward more granular features.

FINANCE & ANALYTICS PROJECTS

Goldman Sachs | Operations Job Simulation (Forage) Oct 2026
Wealth Management Operations · Trade settlement, KYC/AML, operational risk · Certificate of Completion

- **Analysed a Financial Data Report for an ultra-high-net-worth client's art purchase,** flagging incomplete trades, settlement delays and data mismatches that put the funding deadline at risk.
- **Wrote a Trade Fail Report** assigning each issue to the team that resolves it (Trading Desk, IT, Compliance & Risk), with a risk assessment, mitigation steps and process-improvement recommendations.

Deloitte Australia | Data Analytics Job Simulation (Forage) Oct 2026
Tableau, Excel · Data Analysis & Forensic Technology · Certificate of Completion

- **Analysed a month of 10-minute JSON telemetry from 36 machines across 4 factories** (Tokyo, Osaka, Berlin, Shenzhen), building a calculated field that converts each unhealthy reading into 10 minutes of downtime.
- **Built an interactive Tableau dashboard** linking downtime per factory to downtime per device type, identifying the Osaka (Seiko) plant as the largest source of downtime.
- **Classified employee pay-equality scores (–100 to +100) in Excel** into Fair (±10), Unfair (10–20) and Highly Discriminative (>20) bands to flag potentially discriminatory pay by factory and role.

MILITARY SERVICE

Tactical C4I Specialist (Network) | 102nd Armoured Brigade, Republic of Korea Army Jun 2026 – Nov 2027

- **Operate the brigade's tactical C4I (command-and-control) network,** maintaining accurate real-time data between units.

EXTRACURRICULAR ACTIVITIES

IT Specialist | UTS Finance Society Sydney, Australia · Mar 2025 – Nov 2025

SKILLS & CERTIFICATIONS

Programming & data: Python (pandas, NumPy, SciPy, PyArrow, scikit-learn, PyTorch, XGBoost), SQL (Oracle), Java, Git
Business tools: Microsoft Excel (advanced), PowerPoint, Tableau
Analytics & ML: EDA, feature engineering, regression, gradient boosting, LSTM/Transformer, PCA, A/B testing, Matplotlib, Seaborn
Languages: Korean (native), English (native), Japanese (intermediate)
Certifications: DCX Data Analytics Certificate, SHMRD, Seoul (2024–25)
